

Steps to follow:

1. Build the frame
 - a. Go to the board storage area. That is near the floor building table.
 - b. Pick up a band board and carry it over to the building table and place it. It requires two workers to pick up and carry a band board.
 - c. Repeat the same thing for the 2nd band board.
2. Install the joist hanger
 - a. Pick up joist hangers and start installing them one by one by nailing them to the band board. This work can be accelerated if two workers put hangers on two band boards simultaneously.
3. Nail the joist to the joist hanger
 - a. Pick up a joist from the board storage area. This requires two workers.
 - b. Nail the joist to the joist hanger.
 - c. Start with one end (rim joist) and continue with the floor joists.
